

WHY IS **PondClear™** SO IMPORTANT FOR MY POND'S HEALTH?

Water clarity problems are caused by rotting vegetation, leaves, twigs and fish waste that are suspended in the water column or accumulated on the bottom of your pond. PondClear™ Liquid is a special blend of beneficial bacteria designed to work throughout the water column to consume suspended particulate and convert it into an odorless gas promoting a clean and healthy ecosystem. In just a few weeks after your first application you will begin to see a noticeable difference in water clarity.

HOW TO APPLY: Shake well before use. Apply directly out of the container. PondClear™ Liquid works best when poured in several spots along the shoreline.

WHEN TO APPLY: Apply every two weeks when water temperatures are above 50°F. Wait 3 days after an algaecide and/or herbicide treatment to apply PondClear™ Liquid.

QUICK DOSE CHART

Pond Size (surface acres)	Dosage Rate (every two weeks)	4 Month Supply
Up to 1/4 acre	1/2 gallon	4 gallons
Up to 1/2 acre	1 gallon	8 gallons
Up to 1 acre	2 gallons	16 gallons

For ponds larger than 1 surface acre, use 2 gallons per surface acre every 2-4 weeks.

WATER USE RESTRICTIONS:

PondClear™ Liquid may be applied to lakes and ponds used for irrigation and aquaculture. Water treated with PondClear™ Liquid may be used for recreation, fishing and other activities immediately after treatment. Safe for livestock, horses, birds, pets, fish and wildlife. Do not apply to water that will be used for human consumption.
